PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building secure, scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in JWT authentication, 2FA, and RESTful API development, with three end-to-end deployed projects demonstrating strong problem-solving ability. Seeking to contribute as a Full Stack Developer in a dynamic, growth-oriented team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Bootstrap, JavaScript, React.js, Redux

Backend & Database: Node.js, Express.js, Django REST Framework, MongoDB, MySQL

Programming Languages: Python, JavaScript

Tools & Auth: Git, GitHub, Postman, JWT, REST API

Professional Skills: Problem-solving, Teamwork & Communication, Adaptability, Attention to Detail

MAJOR PROJECTS

E-Commerce Full Stack Application *(Django REST Framework + React E-Commerce Platform)*

[GitHub: E-Commerce Application](#) | [Live Demo](#)

- Developed a full-featured E-Commerce platform with 21 REST API endpoints using Django REST Framework (backend) and React (frontend), covering product catalog, shopping cart, order processing, and secure checkout.
- Implemented JWT authentication, email verification, and an admin panel for product management; integrated Cloudinary for image uploads with PostgreSQL as the database.
- Built REST APIs with proper serialization, validation, and error handling across 5 relational models (Product, Order, OrderItem, ShippingAddress, Review); deployed backend on Render and frontend on Vercel.
- Resolved production CORS and image-upload failures by configuring Cloudinary and static/media file serving, and fixed email-verification token expiry with a custom activation system.

Social Media Platform *(Advanced MERN Social Platform with 2FA & Real-Time Chat)*

[GitHub: Social Media Platform](#) | [Live Demo](#)

- Built a full-stack Social Media platform (19 REST API endpoints, 3 data models) using MERN Stack with user registration, profile management, and a follow/unfollow system via MongoDB array operations.
- Implemented JWT authentication, bcrypt password hashing, and Two-Factor Authentication (2FA) using Speakeasy + QR Code.
- Built real-time one-to-one chat with Socket.IO and persistent chat history in MongoDB, alongside profile picture upload via Multer + Cloudinary and user search.
- Fixed Authorization header/middleware issues causing failed JWT delivery and resolved follow/unfollow data inconsistency using \$push/\$pull operations.

Job Portal Platform *(Job Seeker, Recruiter & Admin Portal)*

[GitHub: Job Portal Application](#) | [Live Demo](#)

- Developed a role-based Job Portal (Job Seeker, Recruiter, and Admin) using MERN Stack with 23 REST API endpoints across auth, jobs, applications, resume, and admin modules.
- Implemented JWT authentication, Redux Toolkit for state management, and resume upload handling with Multer.
- Built job search with keyword/location/type filtering and pagination, application status tracking, and a recruiter dashboard with an Admin panel for platform analytics and moderation.

EDUCATION

B.Sc. Computer Science

M.R. Govt. Arts College, Mannargudi • 75% • 2023 – 2026

CERTIFICATIONS

- Full Stack Web Development — HCL GUVI (Completed: June 2026)
- Generative AI with IBM Cloud — IBM SkillsBuild (Completed: July 2025)
